

MOJO BAR BARRIER STRAIGHT, PLASTIC/STAINLESS STEEL

The MOJO Bar Barrier Straight combines a lightweight plastic body with a hygienic stainless steel counter—ideal for temporary bar and catering setups at high-traffic events.

SKU: 1002161.00 | **Categories:** [Crowd Control](#), [MOJO Concert Barricades](#)

PRODUCT DESCRIPTION

The **MOJO Bar Barrier Straight** is a modular event solution that transforms standard crowd control into functional service space. Designed for concerts, festivals, stadiums, and hospitality zones, this unit pairs the familiar stability of [MOJO barricades](#) with a stainless steel countertop—ideal for setting up temporary bars, food stands, or sponsor booths.

The core of the unit is made from recycled LMDPE plastic, offering lightweight yet rigid performance. It uses the same integrated sloped base plate as [standard MOJO barriers](#), ensuring stability through front foot pressure—when guests stand on the plate, they anchor the system even further. This makes the bar barrier suitable for light to medium crowd pressure environments.

The top surface features a brushed **stainless steel counter**, offering hygienic, easy-to-clean functionality that meets catering safety standards. Whether you're pouring drinks, serving snacks, or distributing merchandise, the MOJO Bar Barrier Straight creates a defined, functional service zone that blends seamlessly with your barrier setup.

The MOJO Bar Barrier Straight is also portable and easy to transport. It can be flat-packed and stacked, allowing for efficient storage and logistics. Additionally, [corner elements](#) are available to create enclosed areas, providing flexibility for different event setups. **Compatible with the entire MOJO lineup**, this unit can also be combined with [straight barricades](#), [corners](#), and [access gates](#) to build custom configurations around food courts, beer gardens, or VIP hospitality enclosures.

Key Features of the MOJO Bar Barrier Straight:

- **Stainless Steel Serving Counter** – Hygienic, easy to clean, and ideal for catering stations
- **Lightweight Plastic Body** – Recycled LMDPE provides rigidity with reduced weight
- **Integrated Sloped Base Plate** – Shared design with MOJO barriers for fast, stable setup
- **Modular Compatibility** – Connects to all MOJO straight, corner, and gate modules
- **Flat-Pack & Stackable** – Optimized for transport and compact storage
- **Secure Two-Bolt Connection** – Fastens firmly to adjacent barrier sections
- **Corner Elements Available** – Build enclosures or U-shaped serving layouts

Ideal Applications:

- Mobile bar setups at concerts and festivals
- Beverage service in VIP zones or sponsor lounges
- Food distribution stations in stadiums or public spaces
- Temporary catering booths for trade fairs or fan zones
- Event merchandise and ticketing counters
