

MOJO BAR BARRIER VARIO CORNER, PLASTIC

Versatile Vario Corner for MOJO Bar Barriers, adjustable from -60° to +90° for flexible catering layouts. Designed without a counter for seamless corner transitions.

SKU: 1002177.00 | **Categories:** [Crowd Control](#), [MOJO Concert Barricades](#)

PRODUCT DESCRIPTION

The **MOJO Bar Barrier Vario Corner** is a modular, durable connector designed to integrate with [MOJO Bar Barrier Straight](#) units—enabling clean, enclosed configurations for public catering zones at concerts, festivals, and outdoor events. Built from robust molded plastic, this corner unit provides both structural support and seamless integration within your MOJO bar setup.

Whether you're designing a U-shaped service area, protecting tap installations, or optimizing queue access for high-traffic beverage points, this MOJO Bar Barrier Vario Corner unit helps tailor layouts to your site plan. It allows for 90-degree transitions between straight elements, helping you build bar islands or wrap-around counters that improve flow and security.

The plastic construction makes the barrier lightweight, weatherproof, and easy to clean. Like all [MOJO Barrier elements](#), the baseplate is stabilized when guests stand on it—transforming passive foot traffic into added strength for the structure. Its compact footprint also allows for tight storage and fast deployment, and it flat-packs for efficient transport with the rest of your MOJO system.

Pair the Corner with the [straight bar barrier element](#) for a complete and professional catering solution trusted by event organizers worldwide.

Key Features of the MOJO Bar Barrier Vario Corner:

- **Modular Corner Unit** – Designed to connect seamlessly with straight MOJO Bar Barriers
- **Durable Molded Plastic** – Lightweight, weather-resistant, and easy to clean
- **Supports Secure Enclosures** – Ideal for bar islands, beer stations, and service queue management
- **Stabilized by Foot Traffic** – Gains strength from guest weight on the baseplate
- **Flat-Pack Design** – Easy to transport and store with other MOJO elements
- **Quick Assembly** – Joins via bolt system for secure integration

Ideal Applications:

- Beverage counters at festivals and stadiums
- Enclosed bar setups and U-shaped service zones
- Temporary catering installations at large-scale events
- VIP hospitality bar access points
- Crowd-safe beverage distribution zones
