

MOJO BARRIER 45° NEGATIVE CORNER, BLACK [BLUE]

The MOJO 45° Negative Corner Barrier is designed to form inward angles in your barricade layout, offering flexible control over crowd movement around stages and key zones.

SKU: 1002024.00 | **Categories:** [Crowd Control](#), [MOJO Concert Barricades](#)

PRODUCT DESCRIPTION

The MOJO Barrier 45° Negative Corner in black—also known as the "Blue" corner— is a specialized [barricade element](#) that enables inward bends in barrier configurations, perfect for creating angled layouts around FOH platforms, camera lanes, or stage cut-ins. Its precise 45° negative angle allows production teams to maintain barrier flow while accommodating curved or recessed layouts within complex site plans.

Constructed with a durable black aluminum frame and a silver sloped base plate, this unit blends seamlessly with [standard MOJO barriers](#) while offering structural integrity and fast installability. Like all MOJO systems, it connects via the single-bolt nose-plug interlock for secure and stable integration.

Fully compatible with the wider [MOJO lineup](#)—including straights, gates, and other corners—the MOJO Barrier 45° Negative Corner in black is a valuable component for production teams requiring both flexibility and reliability in [crowd control](#). The product is also available in a silver finish to match visible-stage or traditional event builds.

Key Features of the MOJO Barrier 45° Negative Corner, Black:

- **Fixed 45° Negative Angle** – Ideal for inward corners, cutouts, and complex stage layouts
- **Black Welded Aluminum Frame** – Lightweight, durable, and stage-friendly
- **Silver Sloped Base Plate** – Improves drainage and reduces trip hazards
- **Single-Bolt Nose-Plug Interlock** – Fast and secure tool-free connection
- **Compatible with MOJO Systems** – Works with straights, gates, and other corners
- **Optional Silver Variant Available** – Choose your preferred finish to match stage design

Ideal Applications:

- FOH or backstage cut-ins
- Angled barricade routing around curved zones
- Camera lanes and VIP platforms
- Custom-shaped enclosures around risers or production areas
