

MOJO BARRIER HALF-STRAIGHT, BLACK

MOJO Barrier Half-Straight section for customizable barricade layouts, ideal for flexible crowd control configurations and seamless integration with full-size sections.

SKU: 1002081.00 | **Categories:** [Crowd Control](#), [MOJO Concert Barricades](#)

PRODUCT DESCRIPTION

The MOJO Barrier Half-Straight is a compact, versatile modular element designed for crowd management in tighter layouts—perfect for stage fronts, camera platforms, VIP zones, and confined event spaces.

With its durable welded aluminum frame and matte black finish, this 1.6ft section blends discreetly into production aesthetics. It connects seamlessly to standard [MOJO Straight Barriers](#) via the nose-plug and single-bolt system, giving crews the flexibility to adjust barrier lengths in small increments without visual or structural compromise.

The sloping, grooved floor plate ensures stability and drainage, reducing trip hazards, while rear braces secure strength under pressure. Lightweight yet rugged, each section supports high crowd density and integrates fully into the broader [MOJO system](#), including corners, gates, cable bridges, and more.

Whether filling gaps between full-length sections or creating unique barricade configurations, the MOJO Barrier Half-Straight delivers reliable performance and consistent safety across your event staging.

Key Features

- Compact 0.5m width—ideal for tight fits and custom layouts
- Matte black finish blends into stage builds or broadcast sets
- Connects to standard MOJO barricades via nose-plug and bolt
- Sloped, grooved floor plate for stability, drainage, and anti-trip safety
- Rear brace support—maintains rigidity under crowd pressure
- Lightweight aluminum frame enables easy setup and transport

Ideal Applications

- Bridging short barrier gaps around stages or VIP areas
- Modular adjustments in barricade lines for flow control
- Compact configurations in festival camera pits or media runs
- Enhanced flexibility in high-traffic, tight-space deployments

TECHNICAL SPECS

Weight	11.5 lbs
Dimensions	19.7 × 47.2 × 46.5 in
