

MOJO BARRIER STRAIGHT, SILVER

The iconic MOJO Straight Barrier in silver is the standard for secure, professional-grade crowd control at concerts, festivals, sports arenas, and public events.

SKU: 1001996.00 | Categories: Crowd Control, MOJO Concert Barricades

PRODUCT DESCRIPTION

The MOJO Barrier Straight Silver is a trusted front-of-stage <u>barrier system</u> built for reliability, speed, and superior guest safety. Made from welded aluminum with a classic metallic finish, this barrier section delivers a clean, high-visibility look that complements both indoor and outdoor venues. Designed for high-capacity crowds and rapid deployment, it's the preferred solution for touring productions, event crews, and venue managers.

Its silver finish provides strong stage presence and makes barrier perimeters clearly visible to attendees, security staff, and production teams. Each unit features a heavy-duty base plate with an anti-slip surface and tapered edge for smooth transitions, minimizing trip hazards while managing foot traffic. The reinforced structure includes rear bracing and an integrated step, giving security personnel reliable elevation and fast crowd access.

MOJO Straight Barriers connect via a rugged nose-plug system, secured with a single bolt and pin for rapid assembly without tools. These panels seamlessly integrate with corner units, <u>cable access panels</u>, <u>gates</u>, and even with the <u>black MOJO Barrier Straight</u> variant, enabling flexible layouts that adapt to any stage design or audience zone.

From stadium shows to corporate productions, this all-aluminum crowd control solution combines performance with versatility—making it a cornerstone of every professional barrier setup and <u>crowd management</u>.

Key Features of the MOJO Barrier Straight Silver:

- High-Visibility Silver Finish Classic look for clean, clearly marked perimeter lines
- Modular Compatibility Connects with corners, gates, ramps, and black barrier units
- Lightweight Aluminum Build Durable and portable for fast deployment
- Security Step Platform Elevates staff for quick visual access over the crowd
- Sloped Base Plate with Drainage Prevents fluid accumulation and reduces trip hazards
- Secure Locking System Nose-plug interlock with single bolt and location pin
- Ergonomic Top Rail Comfortable touchpoint for audiences in high-pressure zones

Ideal Applications:

- Concert crowd control in arenas, stadiums, or open-air festivals
- Entry and exit point management at live shows and sporting events
- FOH and press pit perimeters
- VIP and backstage security lines
- Queue control for product launches, red carpets, or televised events
