INTERLOCKING STEEL CROWD CONTROL BARRIER WITH ROLLING BASE, 8FT 2IN

Heavy-duty steel barriers with rolling bases for maximum mobility at large events.

SKU: 1002344.00 | **Categories:** Crowd Control, Crowd Control Barriers

PRODUCT DESCRIPTION

Our steel crowd control barriers with rolling bases provide both stability and flexibility, making them ideal for events where the layout frequently changes. The rolling base allows for easy movement and repositioning, ensuring a seamless setup for concerts, festivals, and public gatherings. Made from high-quality galvanized steel, these barriers can withstand heavy use and harsh weather. The interlocking system ensures a secure connection between barriers, while their lightweight construction makes transport easy.
