

LD ROLLS DRIVABLE EVENT FLOORING, ALUMINUM

LD Rolls, known for their versatile drivable flooring designs, are modular rolls that cover 645 sq. ft. and install in minutes. Ideal for turf protection, light vehicle access, and fast event setup.

SKU: 1012236.00 | **Categories:** [Event Flooring & Ground Protection](#), [Heavy Duty Drivable Flooring](#)

PRODUCT DESCRIPTION

LD Rolls Drivable Flooring—also known as **LD20 Rolls**—are a lightweight, strand-cast aluminum [flooring solution](#) built for fast-paced event environments and light-duty construction zones. Whether you're running cables across a stadium, loading gear with forklifts, or building a temporary access road for utility carts and crew vehicles, LD Rolls deliver fast setup, safe traction, and rugged durability. This unique drivable flooring makes handling such environments straightforward.

Each roll is over **65 feet long** and covers more than **640 sq. ft.** in minutes, providing instant coverage over turf, asphalt, gravel, or stadium floors. The slightly textured surface ensures a secure grip for pedestrians while supporting vehicles with evenly distributed loads. Its low-profile design reduces trip hazards and protects sensitive ground, making it perfect for zones that need LD Rolls drivable flooring capabilities.

Smart Flooring for High-Pressure Events

From back-of-house production access to hospitality builds and parking lanes, LD20 Rolls are used by event professionals, stadium operators, and film set managers worldwide. Their **lightweight modularity** makes transport and storage efficient, while their **load-spreading surface** handles everything from **carts and dollies to pickup trucks and forklifts**. The versatility of LD Rolls Drivable Flooring can't be understated in these demanding environments.

For added protection, rubber mats or geotextile liners can be laid underneath—perfect for preserving delicate grounds or heritage surfaces. With no need for heavy machinery, LD Rolls are deployed by 2–3 crew members in minutes, making them a go-to for mobile stage crews and touring teams. Thanks to these drivable flooring features, setup is both efficient and effective.

LD20 Rolls Key Features:

- **Fast Deployment:** 645 sq. ft. coverage per roll; lays down in minutes
- **Load Distribution:** Ideal for light-duty vehicles, forklifts, and equipment carts
- **Durable Construction:** Strand-cast aluminum with anti-slip texture
- **Ground Protection:** Low profile for turf and stadium safety
- **Modular & Portable:** Lightweight, easy to transport and store
- **Weather-Resistant:** Suitable for outdoor use in all climates
- **Flexible Layouts:** Create roads, walkways, loading areas, or staging surfaces
- **No Machinery Required:** Install with basic crew and no specialized tools

LD Rolls – Ideal Applications:

- Temporary roadways at festivals & construction sites
- Event logistics zones & equipment access routes
- Emergency access lanes on turf or gravel
- Stadium field protection & maintenance access
