

## TERRATRAK PLUS<sup>®</sup> GROUND PROTECTION PANELS, GRAY

Terratrak Plus<sup>®</sup> Gray Ground Protection Panels are heavy-duty, drivable flooring panels designed for stadiums, concerts, and high-traffic event sites. With an anti-slip surface, 160-ton load capacity, and fast tool-free installation, they offer robust ground protection and visual clarity for production zones, crew lanes, and vehicle access.

**SKU:** 1004337.00 | **Categories:** [Event Flooring & Ground Protection](#), [Heavy Duty Drivable Flooring](#)

## PRODUCT DESCRIPTION

**TerraTrak Plus Gray** is a high-performance turf and ground protection system designed for concerts, stadium builds, and event environments requiring robust drivable flooring and visual definition. Built from UV-stabilized HDPE, these modular panels provide extreme load capacity and a clean, professional look—ideal for access lanes, FOH zones, and high-traffic crew areas.

The gray variant features an opaque, non-translucent finish that enhances **visibility** and contrast, making it ideal for pathways, production routes, or back-of-house builds where fast orientation and crowd control are key. Designed for durability and safety, the textured surface of TerraTrak Plus Gray ensures anti-slip performance in all weather conditions.

A [translucent \(turf-safe\)](#) variant is also available, designed to allow air, water, and light to pass through for optimal grass health during longer installs.

### Heavy-Duty Drivable Flooring for High-Traffic Event Zones

Each TerraTrak Plus panel measures approx. 47.2 × 47.2 (1.2 m × 1.2 m), supports loads up to **160 tons**, and installs quickly with a tool-free cam-lock system. Its high-strength interlocking design creates a flush, trip-resistant surface that holds up to forklifts, mobile stages, scissor lifts, and high pedestrian volumes.

TerraTrak Plus Gray can be **seamlessly integrated with Supa-Trac** using patented transition ramps—allowing multi-zone layouts with clearly defined pedestrian and vehicle access areas. Whether you're routing vehicles onto turf or defining clear walkways on synthetic surfaces, this system featuring TerraTrak Plus Gray delivers both strength and style.

### TerraTrak Plus Gray Key Features:

- **Extreme Load Capacity** – Supports trucks, forklifts, aerial lifts (up to 160 tons)
- **High-Visibility Finish** – Gray panels create clear visual zones for production or crowd routing
- **Non-Slip Surface** – Raised traction ribs for safety in wet or dry conditions
- **Tool-Free Installation** – Fast cam-lock system requires no hardware or tools
- **Durable HDPE Construction** – UV-stabilized for use in all climates
- **System Integration** – Connects with Supa-Trac, Terraflor, and Terraplas panels for mixed-use layouts

### Ideal Applications:

- Stadium load-in roads and backstage access
- Forklift and cart lanes across turf or soft ground
- FOH camera decks, artist compounds, and production hubs
- Crew walkways and crowd separation lanes
- Hospitality or media platforms on natural or synthetic grass

<b>Weight</b>	101.41 lbs
<b>Dimensions</b>	94.49 × 1.57 × 47.24 in
<b>Color</b>	Gray
<b>Material</b>	High-Density Polyethylene (HDPE)
<b>Accessories</b>	Loading ramps, patented transition elements
<b>Coverage (Per Pair)</b>	26 sq ft / 2.42 m <sup>2</sup>
<b>Surface</b>	Slip-resistant with load-bearing ribs
<b>Connection System</b>	Tool-free cam-lock (steel-strength nylon)
<b>Load Capacity</b>	Pedestrian + Vehicles + Forklifts (up to 160 tons)
<b>Temperature Range</b>	-4°F to 122°F (-20°C to +50°C)
