

SUPA-TRAC[®] LAWN PROTECTION FLOORING

Lightweight, high-strength modular flooring system for turf protection at concerts, festivals, and sports events. Supa-Trac panels support pedestrians and medium-duty loads on grass, dirt, and other sensitive surfaces.

SKU: 1002391.00 | **Categories:** [Event Flooring & Ground Protection](#), [Turf and Surface Protection](#)

PRODUCT DESCRIPTION

The Supa-Trac [Lawn Protection Flooring](#) system is engineered for temporary event coverage where turf care, speed of installation, and crowd safety are critical. Constructed from durable polypropylene copolymer, these lightweight interlocking panels provide a secure and stable surface over stadium turf, park grounds, golf courses, or sports fields—without damaging the grass underneath.

Designed to handle heavy foot traffic, utility carts, and light vehicles, Supa-Trac® is trusted by venues and promoters worldwide for reliable ground protection during high-impact events. Whether used for temporary tent flooring, walkways, [FOH riser builds](#), or hospitality zones, this system provides a flexible and breathable base that protects both guests and the field. The Supa-Trac floor system ensures optimum lawn protection.

Smart Turf Protection for Busy Events

Supa-Trac features a quick-connect system that enables fast, tool-free assembly—ideal for tight production schedules and overnight builds. Its ventilated, translucent structure promotes natural airflow, light penetration, and water drainage, allowing turf to stay alive even during multi-day installs. This makes it perfect for events requiring Supa-Trac Lawn Protection Flooring.

With a high load-bearing capacity and weather-resistant design, this flooring system is suitable for use in all climates. Optional ADA-compliant ramps and transport frames further enhance accessibility, safety, and logistics. Whether you're organizing a music festival, graduation ceremony, or a televised sports event, Supa-Trac delivers performance you can trust.

Supa-Trac Lawn Protection Flooring Key Features:

- **Turf-Safe Design** – Allows light, air, and water to reach grass beneath
- **High Load Performance** – Supports light vehicles, carts & staging equipment
- **Quick Assembly** – Patented click-together design; no tools required
- **Slip-Resistant Surface** – Ribbed profile ensures secure footing in all weather
- **Lightweight & Stackable** – Easy to handle and transport
- **Modular Scalability** – Suitable for events of any size or layout
- **Weather-Resistant** – Performs reliably in sun, rain, or extreme conditions
- **ADA-Compatible Options** – Ramp accessories available for accessible zones

Ideal Applications:

- Outdoor concerts & festivals
- Stadium floor protection
- Temporary tent flooring
- Pedestrian walkways & platforms
- Broadcast & camera platforms
- Light utility vehicle access on grass
