MODULAR RED FLOOR 5-CHANNEL STANDARD RAMP, MALE

The Modular Red Floor 5-Channel Standard Male Ramp provides secure cable protection with a smooth transition on one side of the center cable ramp for pedestrian and vehicle access.

SKU: 1012420.00 | **Categories:** Cable Protection Ramps, Mobile Event Infrastructure

PRODUCT DESCRIPTION

The Modular Red Floor 5-Channel Standard Ramps, available in both male and female versions, are designed to seamlessly connect to the Modular Red Floor 5-Channel Center Cable Ramp. These ramps provide smooth transitions on either side of the center ramp, creating a secure and continuous surface for cable protection in high-traffic environments.

Constructed from durable materials with a grooved, anti-slip surface, these ramps are engineered to handle heavy-duty use, supporting high-volume pedestrian and light vehicular traffic. The male and female ramps work together to offer complete coverage, ensuring a stable pathway that keeps cables protected and eliminates trip hazards. Perfect for applications requiring robust cable management, these ramps are ideal for event sites, worksites, and any setting with significant foot and vehicle flow.
