

ADJUSTABLE STAGE STAIRS, 4'-7', DUAL HANDRAILS, NON-SLIP STEPS

Durable 4-7 adjustable stage stairs with dual handrails, non-slip treads, and rugged modular compatibility. Designed for tall staging platforms and professional-grade events.

SKU: i123456789.19 | **Categories:** [Stage Equipment](#), [Stage Stairs](#), [Stages](#)

PRODUCT DESCRIPTION

The **4-7 Adjustable Stage Stairs** provide safe, stable access to elevated stage platforms, making them essential for large productions and high-rise event setups. With wide, non-slip treads and dual steel handrails, these stairs support both safety and ease of movement, even under heavy foot traffic.

Built from a corrosion-resistant aluminum frame with a secure clamp-on connection, these stairs integrate seamlessly into [modular stage systems](#) and [portable decks](#). Their variable height design allows for fast adaptation to different elevations—perfect for concerts, civic ceremonies, and mobile stages where every inch of adjustment matters. Each event benefits from these versatile 4'-7' stage stairs that adjust effortlessly.

Whether you're producing a touring concert, managing a conference, or setting up stadium seating, these 4-7 adjustable stage stairs ensure professional-grade safety and fast setup in even the most demanding venues. These stairs' efficient adaptation from 4 to 7 makes them indispensable.

Key Features:

- **Adjustable Height Range** – Designed for 4 to 7 stage decks, providing flexibility
- **Wide Non-Slip Steps** – Ensures secure footing for performers and crew
- **Steel Dual Handrails** – Provides stable, two-sided support
- **Heavy-Duty Construction** – Engineered for high-load, continuous use
- **Quick Setup** – Connects easily via clamp-style fittings
- **Portable Design** – Transport-friendly and event-ready
- **Weather-Resistant Finish** – For both indoor and outdoor applications
- **Stage Compatible** – Works with modular, telescopic, and rolling riser platforms
