

REMOPLA

Heavy duty floor plates – fast and secure attachment of paths, driveways and squares, fire rating UL94HB, load capacity up to 330 t / m² (depending on the substrate)

The robust heavy-duty floor plate Remopla consists of recycled PVC with UV stabilizers. It has a nubby surface that provides perfect support. A fast installation and a good grip are guaranteed by the surrounding fold. Remopla is well suited for fast and secure mounting of the hall floors, driveways, service roads, temporary parking lots, etc. It may also serve as a base for grandstands, seating and stages. Furthermore, it can also be used as a base for materials to be applied, such as sand or earth. The floor panels are ideal for use on gravel, cobbles or grass because they are very robust and resilient.

TECHNICAL SPECS

- » Material: Recycling-PVC
- » Dimensions (LxWxH): 75 x 115 x 4,5 cm cover / 80 x 120 x 4,5 cm outer
- » Weight per item: 32 kg
- » Transportation: 30 pieces per pallet; 24 palletes per truck; approx. 620 qm per truck
- » Loads: up to 330 to per m²
- » Characteristics: Fire rating UL94HB, circumferential fold, nubs on the top
- » Accessories: Road access ramps, PE-Film, Geotextil
- » Color: Anthracite gray
