

## SIGNA ROAD™

Heavy duty floor protection system, suitable for almost any surface, hardly inflammable, color: beige.

SignaRoad™ is designed for the heaviest loads. It is suitable as a temporary truck access, work surface for forklift trucks and telescopic forklifts, maneuvering and support surface for large mobile cranes or as a stage underbody. SignaRoad™ can be laid with low material and labor costs. Through the design of the plates, it is possible to create form-fitting surfaces and paths. The material can be laid on lawns for 2-3 days without sustainably damaging the substrate. Damage to the lawn root can be excluded.

## TECHNICAL SPECS

- » Material: High density polyethylene – HDPE
- » Dimensions (L x W x H): 2.08m x 3m x 6,35cm outer / 1,88m x 2,84mx 6,35cm= 5,34m<sup>2</sup> cover
- » Weight per item: 225 kg
- » Transport: 587 m<sup>2</sup> per truck
- » Properties: 12,5to axle load – approx. 285 t per m<sup>2</sup>
- » Color: beige
- » Accessories: Ramps, Tools, Locks
