

TERRATRAK PLUS

Heavy-duty system used in stadiums or on sensitive surfaces, hard-retardant, color: white

Terratrak Plus is a heavy-duty ground protection system designed specifically for use in stadiums and on sensitive surfaces. Terratrak Plus is navigable with fork lift trucks and telescopic handlers, 150t cranes, trucks with up to 12.5t axle load. It is highly resilient because of its low weight and can be laid by hand with 2 people. The heavy-duty floor creates a continuous surface with no gaps or other pitfalls due to its overlapping design and unique locking system. Due to the light, air and water permeability, the underlying lawn can continue to grow and remain covered for several days.

TECHNICAL SPECS

- » Material: High density polyethylene – HDPE
- » Dimensions (L x W x H): 2,2 x 1,2 x 0,38 m = 2,42 m²
- » Weight per item: 46 kg
- » Weight per m²: approx. 19 kg
- » Transport: 1.123 m² per truck
- » Distributed load: approx. 16,4 t per 150 mm² / approx. 734,2 t per m²
- » Characteristics: UV, air and water permeable, hardly inflammable
- » Color: White
- » Accessories: Ramps, Tools
