

MOJO[®] BARRIERS

LINE-UP GATE

Use in high crowd pressure areas: ★★☆☆☆

A modular gate system compatible with the Mojo aluminium barriers, the line up gate is used for entrance ways at festivals, stadia, venues or other areas with large queuing crowds to manage their ingress. Gates can be placed at site entrances or „golden circle“ or „VIP Areas“. The unique design includes areas suitable for security check points and ticket collection or scanning, while also ensuring the crowd enters the site in an orderly fashion.

TECHNICAL SPECS

- » Full aluminium system, quick to build and quick to take out
